

# Use TappIn to access your NAS data from anywhere

## About TappIn QPKG

With TappIn by GlobalSCAPE, users can safely access data directly from most operating systems, platforms, and mobile devices. TappIn's innovative secure cloud pathway eliminates the need to upload, sync, or pay for additional cloud storage. With the TappIn service, QNAP Turbo NAS customers can securely access and share files of any size with encryption to safeguard content

## 1. Install TappIn QPKG

To install TappIn, login to the NAS web interface as administrator, navigate to Applications Servers > QPKG Center > Available. Scroll down until you see the TappIn QPKG and click "install"

## 2. Register a TappIn account

From the QPKG center, click on one of the links to start TappIn management interface.
